

Important Communication for IT Departments – Change of IP Address

LexisNexis currently utilises a service known as NetLi for performance enhancement/acceleration. On 22 September 2007 this service is being migrated to a new network – Akamai.

As part of this migration, changes to your company's network may be required. They will be required only if you have hardcoded the existing IP address for NetLi (71.19.160.89 - Range 71.0.0.0 - 71.255.255.255) in your network components. To ensure continuous access to LexisNexis online services please also add the new Akamai range (listed below), whilst still retaining the NetLi IP address in the case of fall back.

Customers are strongly encouraged to use the Domain Name Service (DNS) to resolve LexisNexis addresses to IP addresses. The practice of using local or static resolution mechanisms (e.g. a local hosts file) to locate LexisNexis services is discouraged since services may be moved at any time, without notice, to support the dynamic needs of offering web based services.

Customers who choose to define network addresses in network components (firewalls, routers, proxy servers, etc.) are encouraged to define a larger range of addresses versus a small collective of specific addresses. To aid customers in defining these ranges, LexisNexis has registered the below address ranges through which our online platform will be provided to customers. We suggest that all of the below ranges be identified as LexisNexis address ranges when access to any LexisNexis online service is requested.

The Akamai Network address ranges through which LexisNexis may be delivered are listed below:

CIDR	Network Address Range
59.151.128.0/18	59.151.128.0 - 59.151.191.255
60.254.188.0/24	60.254.128.0 - 60.254.191.255
72.246.0.0/15	72.246.0.0 - 72.247.255.255
88.221.0.0/16	88.221.0.0 - 88.221.255.255
122.252.140.0/24	122.252.136.0 - 122.252.143.255
122.252.32.0/19	122.252.32.0 - 122.252.63.255
125.252.192.0/18	125.252.192.0 - 125.252.255.255
125.56.164.0/24	125.56.128.0 - 125.56.255.255
202.43.52.0/24	202.43.48.0 - 202.43.55.255
