

# LexisNexis® Mobility

Your solution for mobile device management

## Have you assessed the security risk of mobile devices in your firm?

With the influx of iPads, iPhones and Android devices into the corporate environment, many organisations are feeling the urgency to manage and secure their increasingly diverse mobile fleet. These days, smartphones and tablets are taking on much of the role of traditional PC's, allowing employees to access sensitive corporate data outside the office environment, on both corporate and personal devices.

LexisNexis Mobility can provide an end-to-end Mobile Device Management service and support, to securely manage all the iOS, Android and Windows devices for your firm.

**Q:** What would you do in the event of loss or damage of a mobile device containing sensitive information?

**A:** Upon notification LexisNexis Mobility can:

- Immediately lock the device remotely and clear sensitive information
- Replace any lost or broken device in as little as 90 minutes in CBD areas
- Restore personal settings and profiles on the loan device

**Q:** How do you manage compliance for employee-owned devices?

- A:**
- LexisNexis Mobility will help you develop and enforce a balanced mobile policy for both employee-owned and corporate devices
  - LexisNexis Mobility will report on any compliance and security breaches

**Q:** How do you support your practitioners' mobility needs and requests?

- A:**
- LexisNexis Mobility provides 24/7 technical support, loan replacement devices for corporate-issued and employee-owned devices and access to mentoring sessions

# Secure, compliant, supported

LexisNexis Mobility is designed to help you protect your sensitive information

## Lack of mobile security is a major risk

No IT manager today would allow a corporate laptop to go unsecured, yet many employees use personal smartphones and tablets that are unmanaged and unsecured to access privileged information. As a result, many law firms are exposed to major security risks. The current move away from security-rich BlackBerry smartphones to iPhones, iPads and Androids, whether owned by the company or employees', bring your own devices (BYOD), means it is time to secure and manage those diverse mobile fleets.

In response to this challenge, LexisNexis has partnered with Mobile Mentor, a reputable mobile management business to create 'LexisNexis Mobility' which provides the legal industry with a proven solution to secure and manage all your smartphones and tablets.

“ The Citrix Global Workshifting index found that by 2012, 93% of organisations will have implemented workshifting policies, up from 37% in 2011. It is clear that the move to BYOD is happening in every organisation whether they like it or not. ”

from "Bring your own device" – beware the legal minefield! *Internet Law Bulletin*, Sep 2012

“ Many organisations who adopt a “virtualised” approach are better able to ensure that when the device is lost or stolen there is no physical data held on the device itself. It is all accessed via the internet and the device can be switched off or killed remotely. ”

Designed to help you protect your sensitive information and support your mobile users.

## Mobile Device Management

There is a growing need to better secure and manage different mobile devices.

LexisNexis Mobility focuses on three core concerns of these devices used in the workforce: Policy, Managing Assets and Security.

### Enforce Policy

The BYO trend seems unstoppable, especially when it comes to mobile devices. LexisNexis Mobility can guide you through these uncharted waters, reducing your risk and advising you on best practices.

LexisNexis Mobility can help you to write a BYOD policy that reflects your organisation. It will take into consideration the interests of IT, Finance and HR, as well as employees, which will help to enforce those policies.

- Update your mobile policy to include BYOD considerations
- Enrol new devices
- Acquire end-user policy acceptance
- Distribute pre-set profiles to new devices
- Reject rooted / jail-broken devices

### Manage Assets

LexisNexis Mobility provides device management services:

- Track devices
- Limit application usage for each user group
- Alert users to expensive overseas roaming charges
- Secure access to company information

### Security

LexisNexis Mobility can help you keep your organisation's data safe on mobile devices via a remote function, including:

- Enforced passcodes on employees devices
- The ability to lock devices
- Restore devices to factory settings
- Wipe sensitive data from compromised devices

### PLUS Mobile Support

LexisNexis Mobility provides valuable end-user support for practitioners through a 24/7 expert helpdesk, saving them time. And to help their productivity, monthly App Innovation Webinars are available providing advice on the best apps for the legal sector.
