Lexis Draft Australia v10.4.5 Release Notes

(Desktop version unless specified otherwise)

Enhancements

- WordRake v3.9 - new editing algorithms and thousands of enhancements to existing algorithms for greater accuracy.
- Support for the new series of the Queensland Reports.
- Ribbon is now disabled when users click on File>Close in Word.

Bug Fixes

- Options button now fully operational on new installations.
- Created new MOAZ file for updated entities.

Lexis Draft Australia v10.3.7 Release Notes

(Desktop version unless specified otherwise)

Bug Fixes

- When setting a matter identification number, the copyright footer link location has been corrected.
- When uploading a file to a newly created folder, the scroll bar has now been corrected to scroll to the bottom of the list and display the new folder.

Lexis Draft Australia v10.3 Release Notes

(Desktop version unless specified otherwise)

Bug Fixes

- Case names with second party names 'A' and 'P' are now fully hyperlinked.

Lexis Draft Australia v10.2 Release Notes

(Desktop version unless specified otherwise)

Enhancements

- Search: renamed 'No search results found' window to be consistent with 'AU Secondary Materials' tab name.
- Removed additional 'Cases' tab from the source bar.
- 0365 - changed tab name from 'Analytical Materials' to 'Secondary Materials'.

Bug Fixes

- Subscript number in footnote no longer recognised as part of citation.
- Case names with special characters are now fully hyperlinked.
- Proofreading tools ribbon no longer disabled for users with 64-bit Windows and 64-bit Microsoft Office when installed.
- Company name is now completely hyperlinked when selecting 'Analyse All' and 'Companies'.
- Recently viewed date in US format fixed.
- Case names and legislation titles beginning with "THE" are now fully hyperlinked and resolved.

Lexis Draft Australia v10.0 Release Notes

(Desktop version unless specified otherwise)

Enhancements

- Capitalisation consistency implemented for Cases and Legislation "insert into document" list.
- Support for ampersands and "and" within citations.
- Consistency in font size and margins when viewing Cases and Legislation lists.
- Upgraded version of WordRake installed. The following new enhancements are included: -
 - 30% speed improvement

- New “progress” Taskbar
- New sentence breaker
- Dictionary and rules improvements / additions

Bug Fixes

- “Note” feature within Work Folders now functional.
- Saved document view within Work Folders now displays “update CaseBase signals” functionality.
- Bill warning are now visible in the Cases and Legislation list pane.
- Upgraded version of Contract Companion installed. The following bug fix is included: -
 - UI no longer localizes based on the regional settings but instead on the Windows display language.
- O365 – *Options window* now closes after saving preferences in Windows 10.
- O365 – “Get Started” button now responsive.
- O365 – Delivery options now functional.
- O365 - “Add in” error when searching for citations as search term resolved.
- O365 - Timeline issues in Cases and Legislation – cite by cite list view – resolved.

Lexis Draft Australia v9.7 Release Notes

(Desktop version unless specified otherwise)

Enhancements

- Increased font size for “Cases & Legislation” default “Citation List” view.
- Users now able to “Create Permalinks” in selection of text.
- Legislations containing “Source” or “Sources” in title now being resolved with correct signals.
- Legislations containing hyphen (-), en dash (–), and em dash (—) in title now being resolved with correct signals.

Bug Fixes

- “Analyse” now working correctly to only include selected text within a paragraph, instead of whole paragraph.
- “Analyse” dropdown list now updating correctly after changing preferences in “Options > Analysis”.
- Cases & Legislation - Citations are not highlighted in second document.
- Cases & Legislation - “Insert into document” check boxes now unchecking as intended after switching list views.
- User’s default browser now being used for some external links and not Internet Explorer.
- Various issues relating to alignment of information in research pane.
- O365 issue causing extra tab to open with infinite spinner in the Cases and Legislation tab for “ambiguous status’ entities.
- O365 issue causing results for “Cite by Cite” view opening in same tab as “Cases and Legislation” tab for results with “ambiguous status” signal.
- O365 issue causing "Sorry your request cannot be completed" message for delivery options.
- O365 issue causing Research Tools document links to open to tab with infinite spinner.
- O365 issue causing Next & Previous Page buttons to be disabled.
- O365 issue causing “Update CaseBase signal” to not respond in “Open folders”.

Previous Version Release Notes

v9.5 (Desktop version unless specified otherwise)

Enhancements

- “Cases and Legislation” – “No search results found in UK” message is now displayed when UK citation is not resolved.
- “Cases and Legislation” > “Insert into Document”/ “Insert Links into Document” feature updates for simpler workflow.
- Updates to document pre-processing that serves the following benefits to Research Tools functionality:
 - Dramatically reduces the load time of large documents.
 - Prevents document from locking at end of “Marking Citations” phase of analysis.
- Superscript removed which dramatically slowed down Research Tools functionality for citations:
 - This superscript checked and identified if any citation in document has a footnote number which should not be included in the citation, then removed that footnote as part of the citation.
- Added notification message to pop-up window while switching between Research Tools.
- Enhanced installer to create new browser emulation registry entries for Winword.exe and Outlook.exe.
- Added Member Identity Profile (MIP) user authentication feature, as with Lexis Advance, allowing a temporary user session to be established without having to enter any credentials. Preferences are deleted after this temporary session no longer exists.
- Renamed “Search” option in drop-down menu to “Lexis Search” when highlighting a term in in document and right-clicking.
- New version of Proofreading Tools - Contract Companion v10.3 - integrated, including the following updates:
 - Streamlined identification of “Used but Not Defined” terms, using underlining or highlighting.
 - Diamonds used as bullets within paragraph text are recognised as “Incomplete Items” and no longer trigger a “Used but Not Defined” error.
 - Optimised so Microsoft Word closes more quickly when exiting.
- Office 365 – “Create Permalinks” now a separate button in research pane.
- Office 365 – UX – Delivery functions aligned and spaced correctly and not overlapping.

Bug Fixes

- Internal server issue that was preventing certain case & legislation citations being recognised.
- Updates to document pre-processing now prevents document from locking at end of “Marking Citations” phase of analysis.
- “Cases & Legislation” - List results tab was cancelled when “Upload File” (WorkFolders) was selected in toolbar.

- “Analyse” - Repealed acts no longer returning "Unresolved Legislation" signal incorrectly.
- “Cases and Legislation” - Results no longer loading incorrectly in Citation List view.
- "500 internal server error" message no longer occurring in Help window hyperlink "User Guides and Training".
- Delivery options (Print, Save, Download, Dropbox), were not working in research pane.
- “Unexpected error for full view document” error no longer occurring.
- “Insert into Document” - Selected documents were not being inserted in some workflows.
- Updates to Help section dialogue & links to reflect updated web site, contact information and other links.
- Office 365 – Extra colon “:” is no longer being added to the “Narrow by” function after selecting “Date” filter.
- Office 365 - Options window was not getting closed after saving preferences.
- Office 365 - Body of text no longer misaligning when RHP is default width. No longer going off page.
- Office 365 – Numbering beside citations no longer incorrectly being recognised as part of the citation.
- Office 365 – “Get Support” button now opening the correct web page.
- Office 365– Home page feature summaries now match actual functionality.
- Office 365 – “Analyse” links no longer remain in document when user clicks “Lexis Draft AU” add-in button in “Home” ribbon.
- Office 365– Lexis Draft AU now correctly appearing in Office Add-in Store, accessible within Word 2016 for Mac, Word Online, and Word for iPad – an in-app alternative to sourcing add-ins to the Microsoft AppSource site.
- Office 365 – Now compatible with Word Online (browser version), in all Lexis Advance supported browsers.
- Office 365 – Now compatible with Word for iPad.
