- Filter by publication ‘type’ in App and Digital Library
- Increased font size in Windows App
- Turn on/off app upgrade notification
- Digital Library enhancement: Admin can return/ assign titles in bulk
- Update on SSO (feature NOT published in 3.15)

Change to minimum system requirements

Please read before upgrading

From R3.15, the minimum system requirements for the application have changed, particularly for iPads.

Please ensure you have upgraded to the below minimum operating systems **before** upgrading to R3.15.

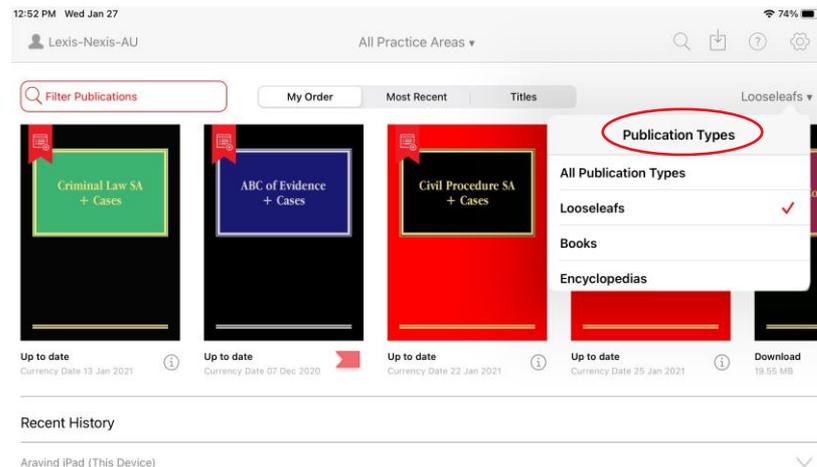

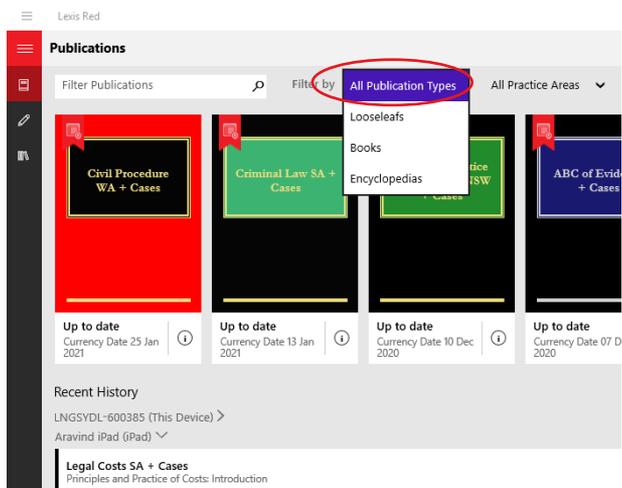

Platform	Operating System	Minimum screen size	Device Type
Android	8+	8-inch	Tablet
iOS	13+	9.7 inch 9.7 inch 7.9 inch	iPad 5+ iPad Air 2+ iPad Mini 4+
macOS	10.11+	NA	Tablet, laptop, desktop
Windows	8.1+	12-inch	Laptop or desktop

Why do minimum system requirements change? As we enhance Lexis Red to introduce new features, minimum system requirements change to keep pace with evolving technology. Planned obsolescence and aggressive upgrade paths for the native operating systems in which each version of Lexis Red is available can cause significant shifts in minimum requirements from time-to-time. We recommend users check the minimum requirements prior to upgrading for each release.

Filter by publication 'type' in App and Digital Library – new feature

Problem statement: We received feedback from our users that it takes too long for them to browse a particular publication type while using Lexis Red (Example – I only want to see books in my publication screen).

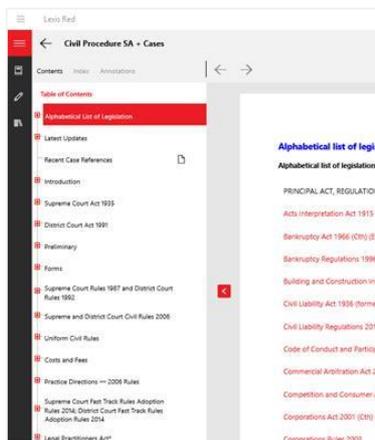

Solution: 'Publication type filter'. This feature enables users to browse by publication type (such as loose-leaf, books or encyclopedias). On selecting a publication type from the filter, the user's publication screen will only display the selected publication type for easy browsing.

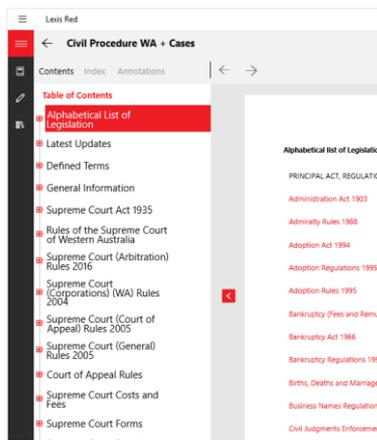

Increased font size in Windows App – enhancement

Problem statement: We received feedback from our users that the font size of the Windows app icons and interface labels was very small and that it affected the usability of the product.

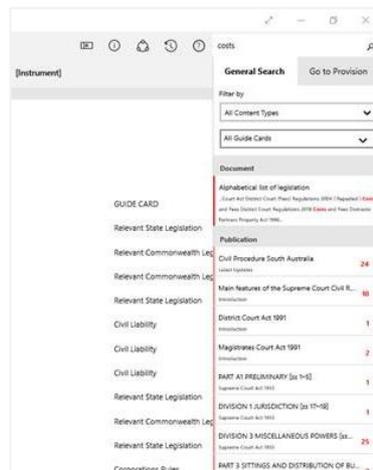

Solution: We have increased the font size of the Windows app icons and interface labels. We also improved the font size on the search results pane.

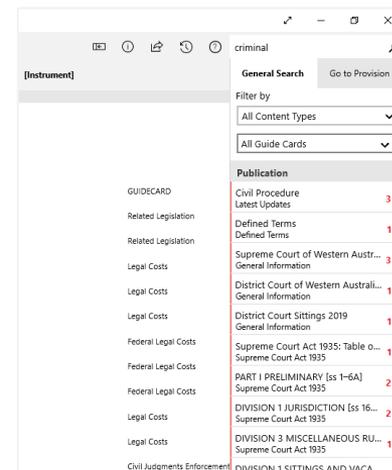

Windows R3.14: Smaller font on navigation labels and Table of Contents

Windows R3.15: Larger font on navigation labels and Table of Contents

Windows R3.14: Smaller font on search feature

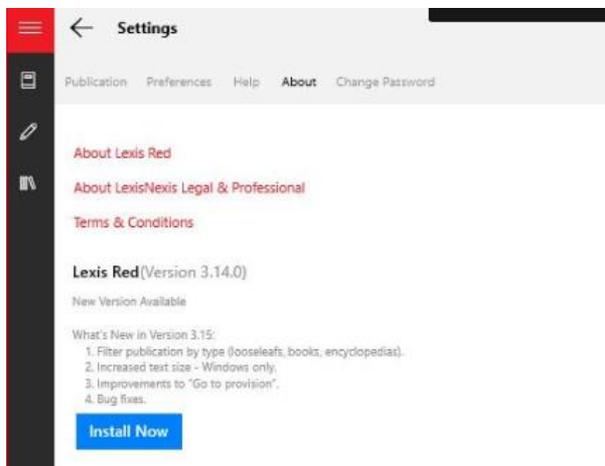

Windows R3.15: Larger font on search feature

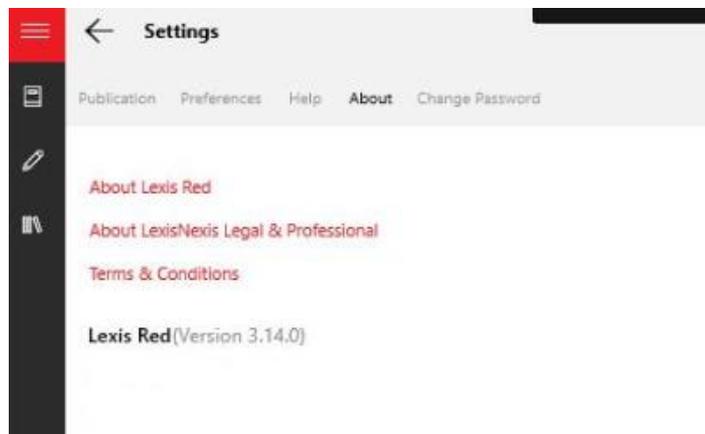

Turn on/off app upgrade notification – new feature

Problem statement: We received feedback from our Large enterprise customers (knowledge managers) that most of the firms block the Windows app store and manually install the Lexis Red app on users' devices. There is a possibility that a user will be using a slightly older app version. The knowledge managers do not want the app to prompt with an app upgrade notification message.

Solution: We have built a new feature in the backend system to hide the 'app upgrade notification' message at an account level.

User allowed to see app upgrade notification message

User not allowed to see app upgrade notification message

Digital Library enhancement: Admin can return and/or assign titles in bulk

Problem statement: We received feedback from librarians asking that they be able to return titles in bulk and also assign titles in bulk.

Solution: We have added check boxes in the Digital Library to allow admin users to perform 'bulk return of titles' and 'assign titles to multiple users'.

Lexis Red Digital Library

The screenshot shows the Lexis Red Digital Library interface. On the left, there is an 'Account Status' table and an 'Accounts' list. The 'Loans' section is active, showing a red 'Assign Loan to User(s)' button at the top. Below it, there are input fields for 'Borrow Time' (30 days) and 'Borrowing Limit' (7), with a 'Save as default' button. A search bar is present. Under 'All Publication Types', the 'ABC of Evidence' category is expanded, showing a list of titles. A red box highlights a 'Select All' checkbox and a 'Filter by name' search field. Below this is a table with columns: Name, Borrowed From, Return Date, Days, and Return. Two titles are listed: 'chan, caroline' and 'Janjua, Manjeet'. A 'Request list >' button is at the bottom right.

Items	Used	Avail
Allocated Users	345	1500
Subscription Status	1594	35871
Loan Status	19	1853

Name	Borrowed From	Return Date	Days	Return
chan, caroline	21 Nov 2020	1 Mar 2021	28	[icon]
Janjua, Manjeet	27 Feb 2020	26 Feb 2021	25	[icon]

Digital Library: bulk return of titles

The screenshot shows the Lexis Red Digital Library interface for assigning titles to multiple users. The 'Loans' section is active, showing a list of titles. A red box highlights the 'Civil Procedure Qld Supreme Court Practice (Archived)' title. To the right, there is a 'Versions' section with a search bar and a list of titles. Below that is an 'Accounts' section with a 'Filter by name' search bar and a list of users. A red box highlights the 'Select All' checkbox and the 'Acle, Jemalyn' user. At the bottom, there are 'Cancel' and 'Assign Loan to Users' buttons.

Filter by name
<input type="checkbox"/> Select All
<input type="checkbox"/> 08, 09ivantest
<input type="checkbox"/> 09, 07
<input type="checkbox"/> 12220802, 11110802
<input type="checkbox"/> 126bi2, miccypi
<input type="checkbox"/> Abaja, Vee
<input type="checkbox"/> Abdulmalik, Mansawi
<input type="checkbox"/> Acasio, Belinda
<input type="checkbox"/> Acle, Jemalyn
<input type="checkbox"/> Acle, Jemalyn

Digital Library: assign titles to multiple users

Update on SSO (feature NOT published in 3.15)

- Single Sign On (SSO) testing – currently the SSO feature is being developed for the Windows 8+ version of the application. Testing is in progress with a few customers. If your firm is interested in testing / implementing the SSO feature, please discuss with your Relationship Manager.
