

Lexis® Web Service APIs

Bringing content into your work environment
when and where it is needed

AN EXPANSIVE UNIVERSE OF CONTENT NOW AT YOUR FINGERTIPS

Sick of swapping from one application to another to find that one insight, fact, clause, research and more?

Take full advantage of your LexisNexis content by accessing 8 million+ documents of CaseLaw, Legislation and Secondary materials and 40+ years of news archives from more than 36 thousand news sources.

Bring together this superior breadth and depth of content with your own insights and content and accelerate your client-centric strategy.

Let Lexis Web Service APIs do the work for you

Lexis Web Service Application Programming Interface (API) integrates the trusted, authoritative content you've come to expect from LexisNexis directly into your most important business applications.

End users can now have instant access to critical, relevant information as a natural part of their daily workflow.

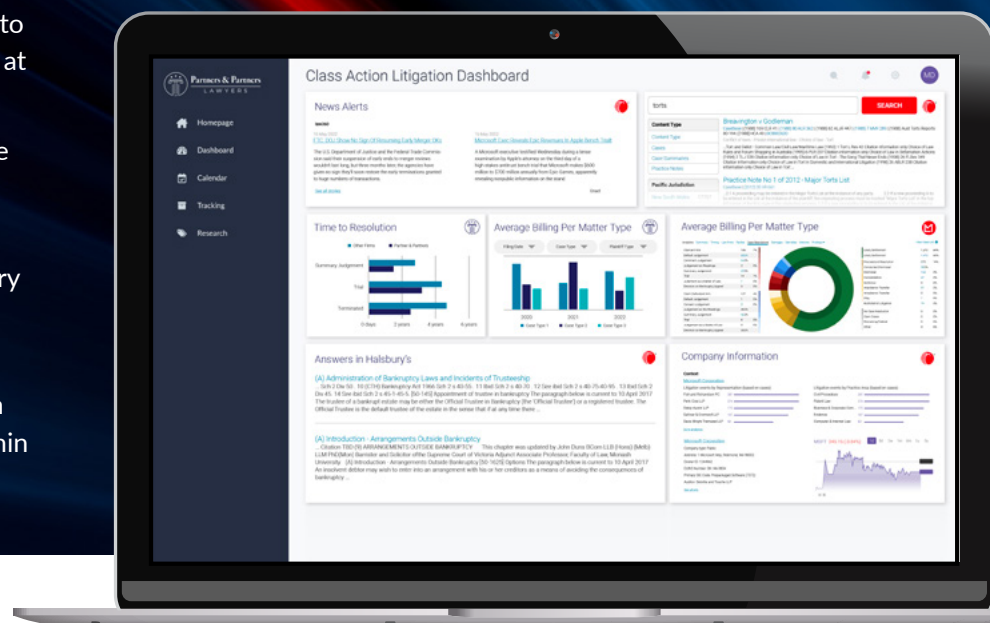

Gain efficiencies as well as delighting your staff by making their workflow easier and faster

Relevant insights are surfaced at your point of need. See results from all of your content providers, or your own document management system and the open web - all in one place.

Reduce risk and create a unique workflow in your practice

You can now differentiate the way your team works by providing them exactly the content they need when and where they need it and also drive that consistency that can differentiate your practice. Manage your practice risk by accessing all research and proprietary data in one single portal. By surfacing the content when and where your teams need it, be confident that they are using the latest content and the latest forms and precedents.

- Bring your Intranets or Portals to life by embedding rich content at the point in need
- Pull relevant legislation that are most commonly used by your teams
- Set up your own personal library with your top 10 books and publications*
- Access valuable metadata from the documents you access within LexisNexis

This illustration is a mock-up only and does not reflect the final product. The user experience and content display will depend on many factors, such as: the specific requirements; the complexity of the API queries and the extent to which content can be surfaced.

*Some LexisNexis content may not be available via Lexis Web Service APIs. Contact your Relationship Manager for more details

How will Lexis Web Service APIs work for you?

Data-driven legal analysis

Lexis Web Service APIs toolkit provides an interface that allows you to make direct requests to the LexisNexis data services, bypassing the Lexis Advance web application entirely. The interface will allow your teams to work seamlessly across the entire spectrum of their workflow.

WORKFLOW

Build customised workflows within practice area pages by adding a search bar to find relevant information from Lexis Advance

Legal professional can now research Lexis Advance content directly from within an organisation's practice area page without leaving the firm's firewall

INTEGRATION

Allow users to add information from third-party applications to their workflows in addition to the Lexis Advance content to get the best results

Practitioners can sign into their news monitoring system to learn about new trends and developments

RECENCY

Users can set up initial searches and be notified of changes in CaseLaw, Legislation, or get the latest news updates by email or within their practice area pages

Users can view specific alerts for a targeted practice area. From here they can link to the full text of the CaseLaw or Legislation

ENRICHMENT

Get access to the most recent and marked up search results from Lexis Advance along with the firm data you are using in your task

Researchers researching CaseLaw within their internal workflow can use post-search filters such as jurisdiction to refine search results

Top 4 reasons why you should consider Lexis Web Service APIs

ACCESS IMPORTANT CONTENT AT YOUR POINT OF NEED

Get CaseLaw, Legislation, Precedents, and other LexisNexis content from within the workflow solution you actually 'live in'

INTEGRATE RESULTS FROM EVERYWHERE INTO A SINGLE VIEW

See results from all of your content providers, or your own document management system and the open web - all in one place

STAY ABREAST OF ALL LATEST DEVELOPMENTS

Display customised news feeds within your intranet or other internal systems

KNOW MORE ABOUT YOUR CUSTOMERS

Pull detailed and comprehensive firmographic data into your CRM systems
